- PROFESSIONAL EXPERIENCE
- Holive Services Inc. | 2025–Present**
Senior Full Stack Developer

 - Spearheaded the architecture and development of a scalable SaaS platform using Next.js, React, and Supabase, serving enterprise-level clients.
 - Mentored junior developers and led code reviews, promoting high standards in code quality and performance optimization.
 - Integrated Paystack API for secure and efficient payment processing, ensuring seamless financial transactions.
 - Automated deployment pipelines with GitHub Actions (CI/CD), significantly reducing downtime and accelerating release cycles.
 - Implemented unit and integration testing using Jest, increasing code reliability and reducing bugs by over 40%.

Stack: Next.js, React, Tailwind CSS, Supabase, PostgreSQL, Paystack API, Jest, GitHub Actions

- Mihaela Coaching Hub | 2024–2025**
Senior Full Stack Developer
- Developed and deployed a fully responsive web platform to showcase Mihaela’s coaching services and digital programs.
 - Integrated external APIs and dynamic content management features using Next.js, Typescript, and PostgreSQL.
 - Collaborated closely with the client to refine UX/UI, resulting in improved user engagement and brand consistency.

Stack: Next.js, React, Typescript, Tailwind CSS, PostgreSQL

- Yemidyn Fashion | 2023–2024**
Senior Frontend Developer
- Delivered pixel-perfect, mobile-optimized UIs for an eCommerce platform, enhancing user experience and reducing bounce rate.
 - Worked with designers to translate Figma prototypes into interactive components using React and Material UI.
 - Applied Jest for testing key UI components, ensuring stable and bug-free production releases.

Stack: React, JavaScript, Material UI, Jest

EDUCATION**Lagos State University | 2019–2023**

Bachelor of Science in Biochemistry

SKILLS**Frontend Development:** HTML, CSS, JavaScript, React, Next.js, Tailwind CSS, Chakra UI, Material UI**Backend & Databases:** Nodejs, Express, Python, PostgreSQL, MongoDB, Supabase, API Integration**Version Control & DevOps:** Git, GitHub Actions (CI/CD), Debugging, Testing (Jest)**AI & Machine Learning:** AI Integration, TensorFlow

CERTIFICATES**Machine Learning with Python | 2025**

FreeCodeCamp

Backend Development and API | 2024

FreeCodeCamp

Gemini API by Google | 2024

Udacity

Cloud Computing | 2024

FGN-ALAT

Cybersecurity | 2022

The Open University

PHILOSOPHY

To me, developing and building isn't just about code—it's about seeing through the eyes of others. The ability to think from someone else's perspective and create something truly impactful—that's where the magic happens.
